Recent Trends in Civil Engineering

Select Proceedings of TMSF 2019

Series: Lecture Notes in Civil Engineering

- Presents latest research in civil engineering and allied disciplines
- Covers diverse topics on building materials, geoenvironment, and construction management
- Highlights emerging research in intelligent transportation and smart cities

This book comprises select peer-reviewed proceedings of the International Conference Trending Moments and Steer Forces – Civil Engineering Today (TMSF 2019). It presents latest research in different domains of civil engineering like structural and concrete engineering, geotechnical engineering, transportation engineering, environmental engineering, and construction technology and management. The contents also include miscellaneous applications of civil engineering in a wide range of technical and societal problems making use of engineering principles and relational data structures involving measurement sciences. Given the range of topics covered, this book can be useful for students, researchers as well as practitioners working in the field of civil engineering.
